

Pay taxes online:

Use EFTPS-OnLine.

An **easy to use**, convenient, and secure way to pay all federal taxes.

Enrollment is easy, and can be completed in minutes. Just make sure you have your Tax ID number handy, the exact spelling of your name as it appears on your IRS tax documents, and your financial institution information.

Using any Web-connected computer, taxpayers can schedule payments in advance:

- 120 days for businesses
- 365 days for individuals

Taxpayers are even able to print out a receipt of their payment instructions, and view 16 months of tax payment history.

How does EFTPS work?

After successful enrollment, the taxpayer enters a payment amount and settlement date online or by phone.

EFTPS then generates an EFT Acknowledgement Number for the taxpayer's records.

On the settlement date indicated, funds are transferred from the taxpayer's specified bank account to the Treasury's account and the IRS receives the tax payment information. It's that simple.

No one has unauthorized access to a taxpayer's bank account, and only information is transmitted over the Internet. No funds move through the Internet.

Who should use EFTPS?

All business and individual taxpayers are eligible to use EFTPS.

EFTPS for the business taxpayer:

EFTPS is designed to accommodate virtually all business federal tax payments, including corporate, excise and employment taxes.

EFTPS is ideal for individual taxpayers

making 1040 quarterly estimated payments. The scheduling feature of EFTPS allow taxpayers to schedule the 4 estimated payments at one time, without having to go back each quarter and remember to make a payment by the due date. With EFTPS, it's all automatic once the taxpayer enters the instructions—either online or by phone. Funds are transferred on the date(s) indicated on the instructions.

What other payment methods are available?

Taxpayers that select EFTPS-Direct on their enrollment form have the option of using 2 payment methods interchangeably: Internet or phone.

Taxpayers may also choose to use a service offered by their financial institution.

They should check with their financial institution in advance to make sure their financial institution offers such a service and the taxpayer is eligible to use that service, and the costs for using the service.
